

# Focus on Ventilation: Keeping Schools Safe

Rechargeable, portable devices with remote trend monitoring of carbon dioxide (CO<sub>2</sub>) levels

## Why is it important to monitor indoor air quality and CO<sub>2</sub> levels in schools?

According to the Centers for Disease Control, CO<sub>2</sub> levels can be used as a proxy to measure how clean indoor air is. Every time someone exhales, speaks, sings etc., CO<sub>2</sub> is released into the air. As CO<sub>2</sub> levels rise in closed spaces with poor ventilation, so does the air exhaled by someone else in the room (aka “shared air”). Research has shown that as the levels of CO<sub>2</sub> rise, there are greater levels of “shared air” and increased risks of transmission of airborne viruses (e.g. COVID-19, influenza, whooping cough). Measuring CO<sub>2</sub> levels allows school administrators and staff to get an objective, data-based measure of indoor airflow in classrooms or other shared spaces. Keep school staff and students safe by monitoring indoor air and acting quickly to improve air quality.

## Designed Specifically for Schools

- **Remotely monitor your CO<sub>2</sub> levels:** CO<sub>2</sub> Check™ includes remote trend monitoring via a mobile app without any additional devices required. Just plug in your device, connect to the Wi-Fi, and your device will start transmitting data seamlessly to a mobile app and dashboard.
- **Mobile app and dashboard:** Designed for facility managers, administrators, and staff to be able to monitor their school’s air quality from any location at any time. And, with push notifications, when acceptable CO<sub>2</sub> levels are surpassed, staff is alerted so they can take actions to improve air quality.
- **Simple, easy-to-use design:** Visual display with simple graphics to help in the classroom to prompt actions to improve air quality.
- **Included lesson plans to teach staff and students about CO<sub>2</sub> monitoring and improving indoor air quality:** Train staff and students about the importance of indoor air quality and staying safe using our CO<sub>2</sub> monitoring lesson plans.
